## WHAT IS TEMPERED GLASSWARE?

Tempering is a thermal process of heating a glass close to melting point then cooling it rapidly. This causes the outer surface of the glass to cool and shrink faster than the inside of the glass wall creating a tight skin. This closes the many hairline fractures that naturally occur in regular annealed glass and make a vastly stronger product.

## HOW STRONGER IS TEMPERED GLASS?

Tempered glass is up to 5 times stronger. This is known as Mechanical Shock Resistance, making a cost effective choice.

## ARE VICRILA GLASSES FULLY TEMPERED?

All glassware with the  is fully tempered from rim to foot on the inside and outside. Not all manufacturers temper with the same high standards.

## IS TEMPERED GLASSWARE MORE RESISTANT TO TEMPERATURE CHANGES?

Fully tempered items are thermal shock resistant up to 130°C. This is tested by taking an item of glass from an oven heated to 150°C and then plunging it into cold water. The glassware will not shatter or break.

## IS TEMPERED GLASS SAFER?

Should a glass break due to an excessive blow it will break into smaller pieces than an annealed glass, making it safer to use within the hospitality industry.

## DO I HAVE TO USE TEMPERED GLASS?

By different region the local licencing authority will be able to advise you of this.

## HOW CAN I TELL IF MY GLASSWARE IS TEMPERED?

Vicrila marks the glass with a  on each tempered item.

## RIM TO FOOT TEMPERED "T"

Fully tempered glasses are resistant to mechanical shocks, extending the life of the product up to five times, compared with annealed glass ranges.

## THERMAL RESISTANCE

Thermal shock tested and resistant to 130°C and can withstand changes in temperature from hot to cold.

## CE MEASURE (LCE) & UKCA LINE

VICRILA is officially certified by the APCER and NMO.

## DISHWASHER & MICROWARE SAFE

Strong and durable, shock tested and capable of industrial dishwasher cycles, while maintaining clearness.

## SAFETY

Should a glass break due to an excessive blow, a tempered glass will break into small pieces than an annealed glass.
